

Special Interest Group (SIG) Personalised and Precision Medicine

In 2023, Personalised and Precision Medicine (PPM) SIG continued to contribute to relevant FIP programmes as detailed below.

- Co-organized and co-hosted Precision Medicine webinars series with the FIP Technology Forum. Between 2022-2023, the PPM SIG joined force with the FIP Technology Forum to organize and hosted a series of 3 set of webinars focusing on Precision Medicine. These webinars were well attended by an average of around 600 people per webinar. PPM SIG chair served as co-chair and speaker for the first webinar on 4/21/2022 (Precision Medicine: the Current status). PPM SIG chair also co-chaired and served as a moderator for the second (10/5/2022) and third (2/7/2023) webinar. The third webinar entitled “Precision Medicine: What Will it Cost?” had a record number of registrars of almost 800 people from around the world.
This is the one activity our SIG is particularly proud of, because it enhanced the unique position of FIP as a global organisation for both scientists and pharmacists.
- Served as 2023 FIP Brisbane annual meeting abstract reviewers for Precision Medicine related abstract review. Selected abstracts to be presented orally.
- Provided advice on proposals submitted for 2024 FIP Cape Cod annual meeting.

Goals in 2024

- Goal #1: Establishing a new functional leadership team that will be able to efficiently communicate to its members and have broad connection with other FIP sections and groups.
- Goal #2: Participating and contributing to the strategic planning of BPS within FIP.
- Goal #3: Contributing to the one FIP goal by participating in all relevant FIP programmes.
