

Workshop Development Goals

6. Leadership development

Strategies and programmes in place that develop professional leadership skills (including clinical and executive leadership) for all stages of career development, including pharmaceutical sciences and initial education and training.

8. Working with others in the health care team

Clearly identifiable elements of collaborative working and interprofessional education and training which should be a feature of all workforce development programmes and policies.

Workshop Questions

10:45-11:05

1. General achievability of WDGs

11:05-11:20

2. What type, or form, of targets would be appropriate for implementing WDGs
3. Ways of monitoring/measuring progression of WDGs (at country level)

11:20-11:40

4. Ways of disseminating WDG implementation, or contribution, at country level.

**different perspectives may have different views on this*
